Services Offerings for Exhibitors and Sponsors at #IDSF22

The 2nd International Digital Security Forum (IDSF) to be held from May 31st – June 2nd, 2022 as a hybrid event is organized by AIT Austrian Institute of Technology in partnership with the Austrian Security and Defence Industries Group of the Austrian Federal Economic Chamber and with the support of major Austrian ministries, the Kuratorium Sicheres Österreich (KSÖ) as well as in cooperation with international partner organizations.

#IDSF22 will dedicate this week to bring together international and national leadership and stakeholders for information exchange and to foster collaboration and build partnership in the context of this year's conference motto "Secure digitalisation for a safe, green and sustainable future." The conference will be a mixture of both remote and in person presentations and accompanied by an exhibition.

The virtual premiere of IDSF held in December 2020 was a tremendous success with more than 500 participants from over 40 countries and 68 speakers. Depending on the further development of the pandemic, #IDSF22 is created as a hybrid event that supports physical participation and takes place in the heart of Vienna - in the cultural hotspot MuseumsQuartier Vienna.

Sponsors of the #IDSF22 are invited to take this opportunity to underscore their role as active stakeholders in the context of shaping and driving forward a secure digitalisation for the benefit of an interconnected society. Present your solutions, experience and products to an interested international audience, and engage directly with other professionals from research, industry and the public sector. We invite you to become part of the IDSF community - select a sponsorship package that suits your organisation's needs.

For more information about the programme please visit www.idsf.io
