Open Data in Austria & beyond

1. June 2022

#IDSF22

Brigitte Lutz – Data Governance Coordinator Chief Executive Office Executive Group for Organisation, Safety and Security Process Management and ICT Strategy

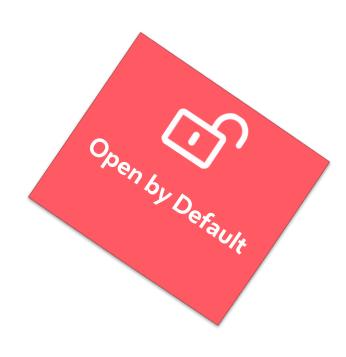

From Open Data Governance to Data Excellence

- 2011: City of Vienna is Open Data pioneer in the german-speaking countries
- OGD publication in quarterly data phases since May 2011
- data.wien.gv.at leads to publication on data.gv.at
- Over 500 data sets (geo-data, statistical data, real-time data,...)
- Over 300 applications with OGD Vienna (apps, visualizations, ...)
- 2019: <u>Data Excellence Strategy</u> "Open by default"
- 2030: Digital twin of the City of Vienna
- Info about Open Data Vienna: digitales.wien.gv.at

Data Excellence - Vision

Reliable information & data are core values of the City of Vienna.

We make data - as open as possible and as protected as necessary - accessible in a high-qualitative and simple way

- Thereby we create a high benefit for the population, economy & science and
- contribute to an efficient execution of administration tasks.

Who needs Open Data?

Transparency and participation Innovation Services

Increase in value

Knowledge management

Society

- Transparency projects
- Datajournalism
- Databased participation<> objective discussion
- Citizens, tourists:
 Better services because of application and apps

Science

Database for research project

data

Exciting data for teaching

6

Economy

- New business area
- Application/apps

- Responsible for governance at the data domain level
- Assignment at collection level

Data Experts & Data responsible parties

- Responsible for the description and maintenance of specific data
- Assignment on data set level

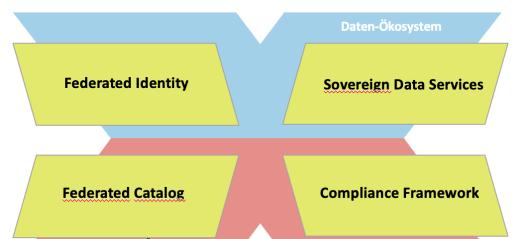

GAIA-X in the City of Vienna

Targets

The City of Vienna actively supports the Smart Cities domain within GAIA-X as a virtual European data infrastructure eco system

- Leveraging the cost and effort benefits of (cloud-based) data services for municipalities as well
- Development of a technical and methodological ecosystem to accelerate datadriven digital transformation
- Ensuring data sovereignty and creating trust
- Implementation of standards for data models and interfaces avoidance of the creation of isolated solutions
- Urban Data Space & Digital Twin of the City of Vienna: Integration of private, commercial and public data
- Leading principles: Open X (Data, Source, API, Standards, Documentation)
