

Navigating the EU Data Strategy: Recent Legislative Initiatives

Christiane Wendehorst

EU Data Strategy COM(2020) 66 final

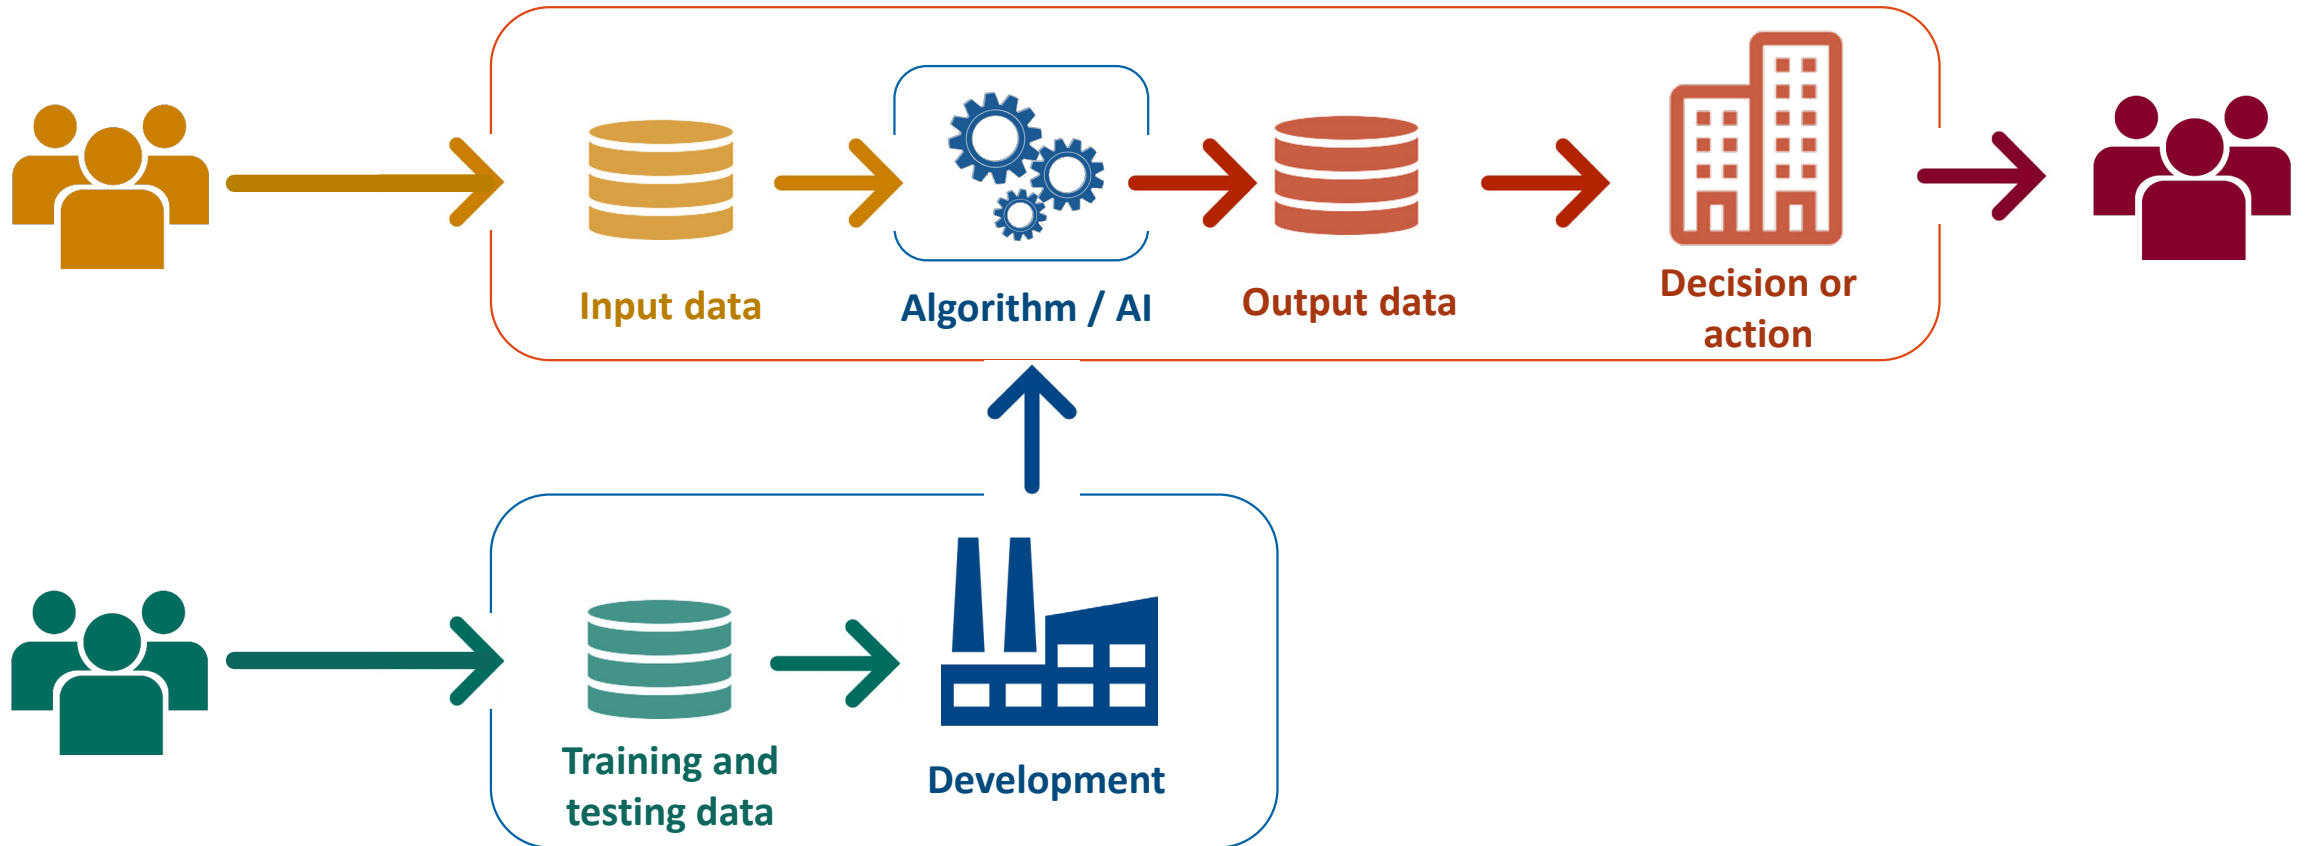

A cross-sectoral
governance
framework for data
access and use

Strengthening
Europe's
capabilities and
data
Infrastructures

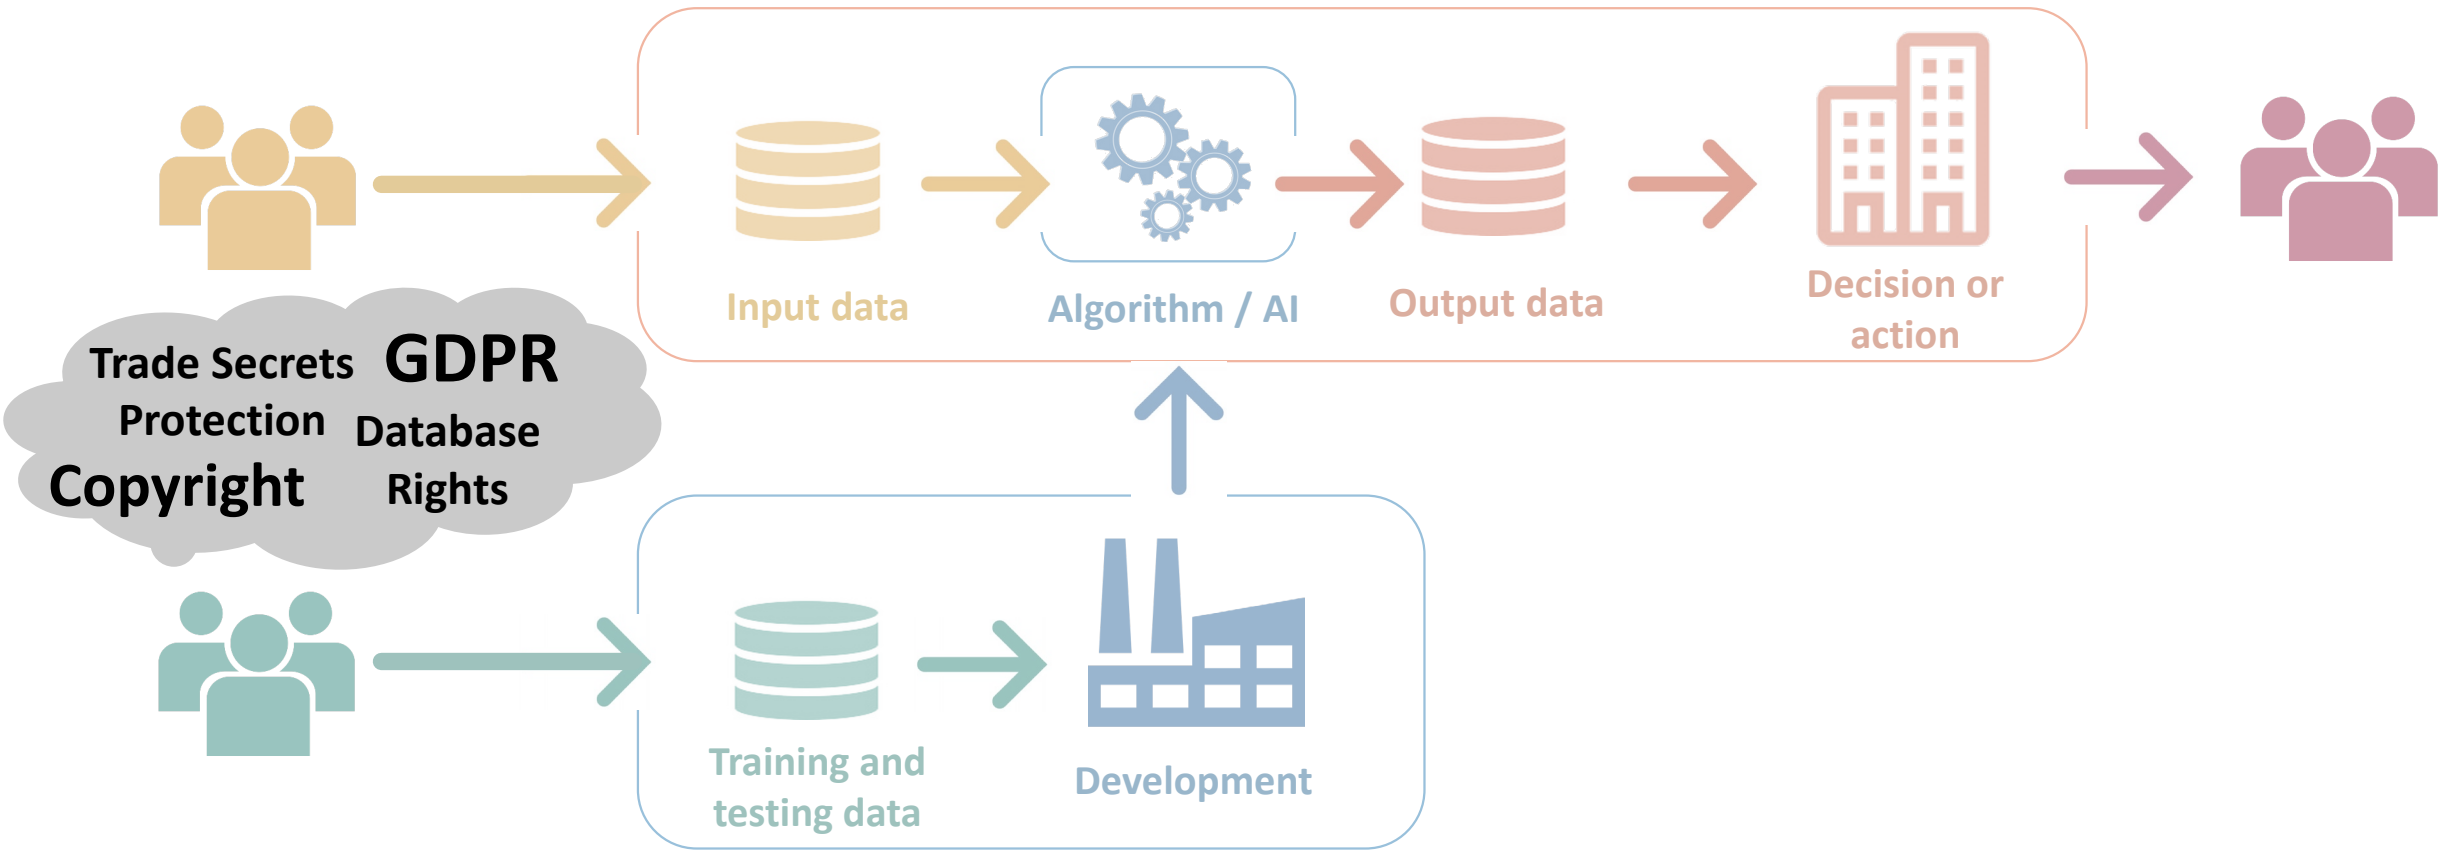

Empowering
individuals,
investing in skills
and in SMEs

Common
European data
spaces in strategic
sectors

Data use for AI and other digital technologies

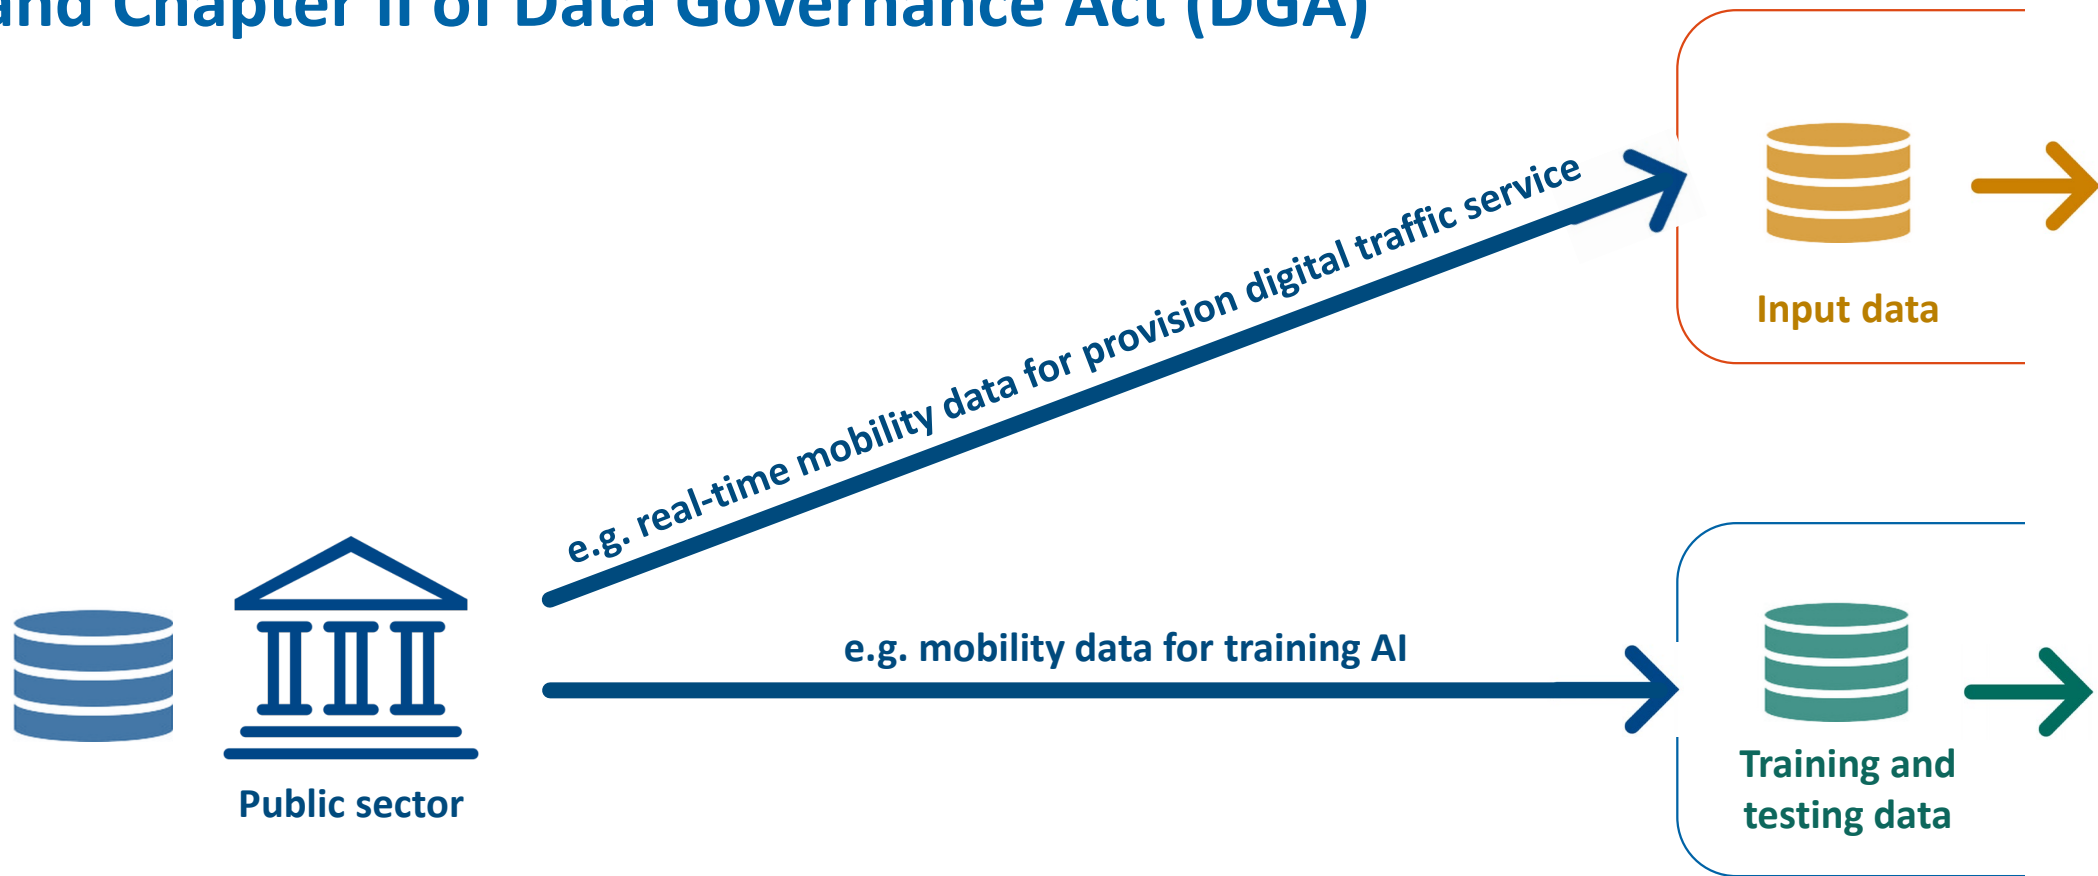

Data use for AI and other digital technologies

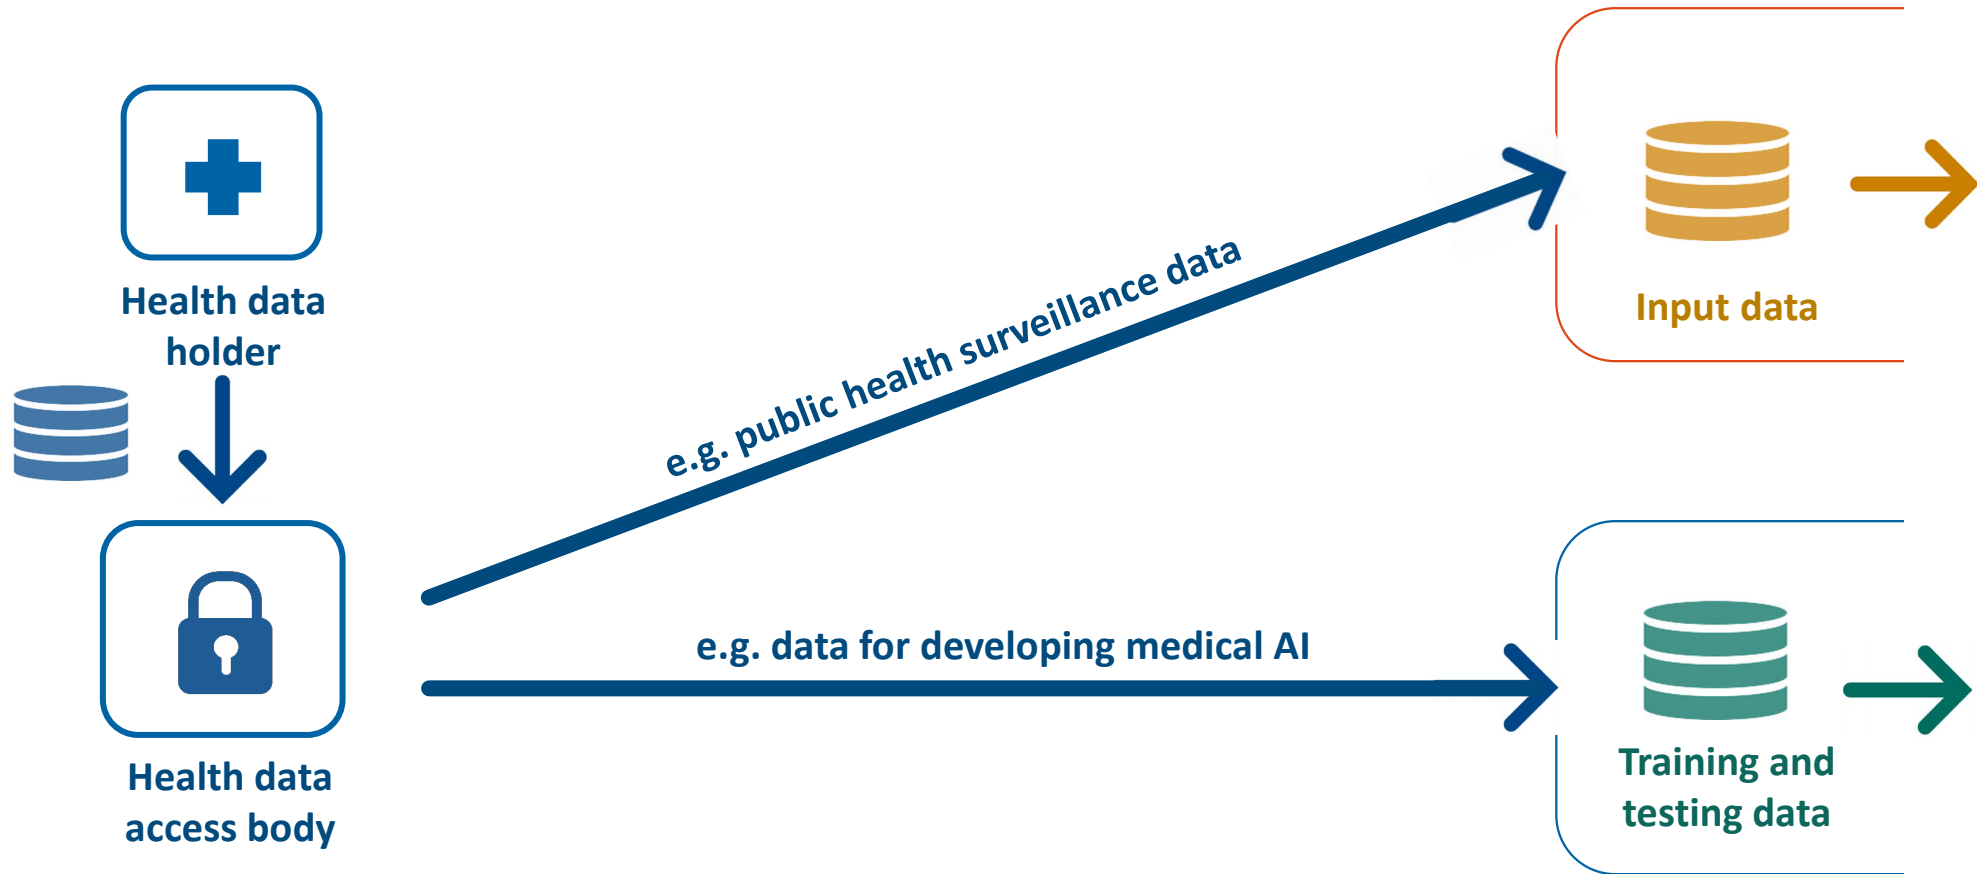

**How do we get hold of data
in sufficient quantity and quality and in a way that
maintains trust and respect for fundamental rights?**

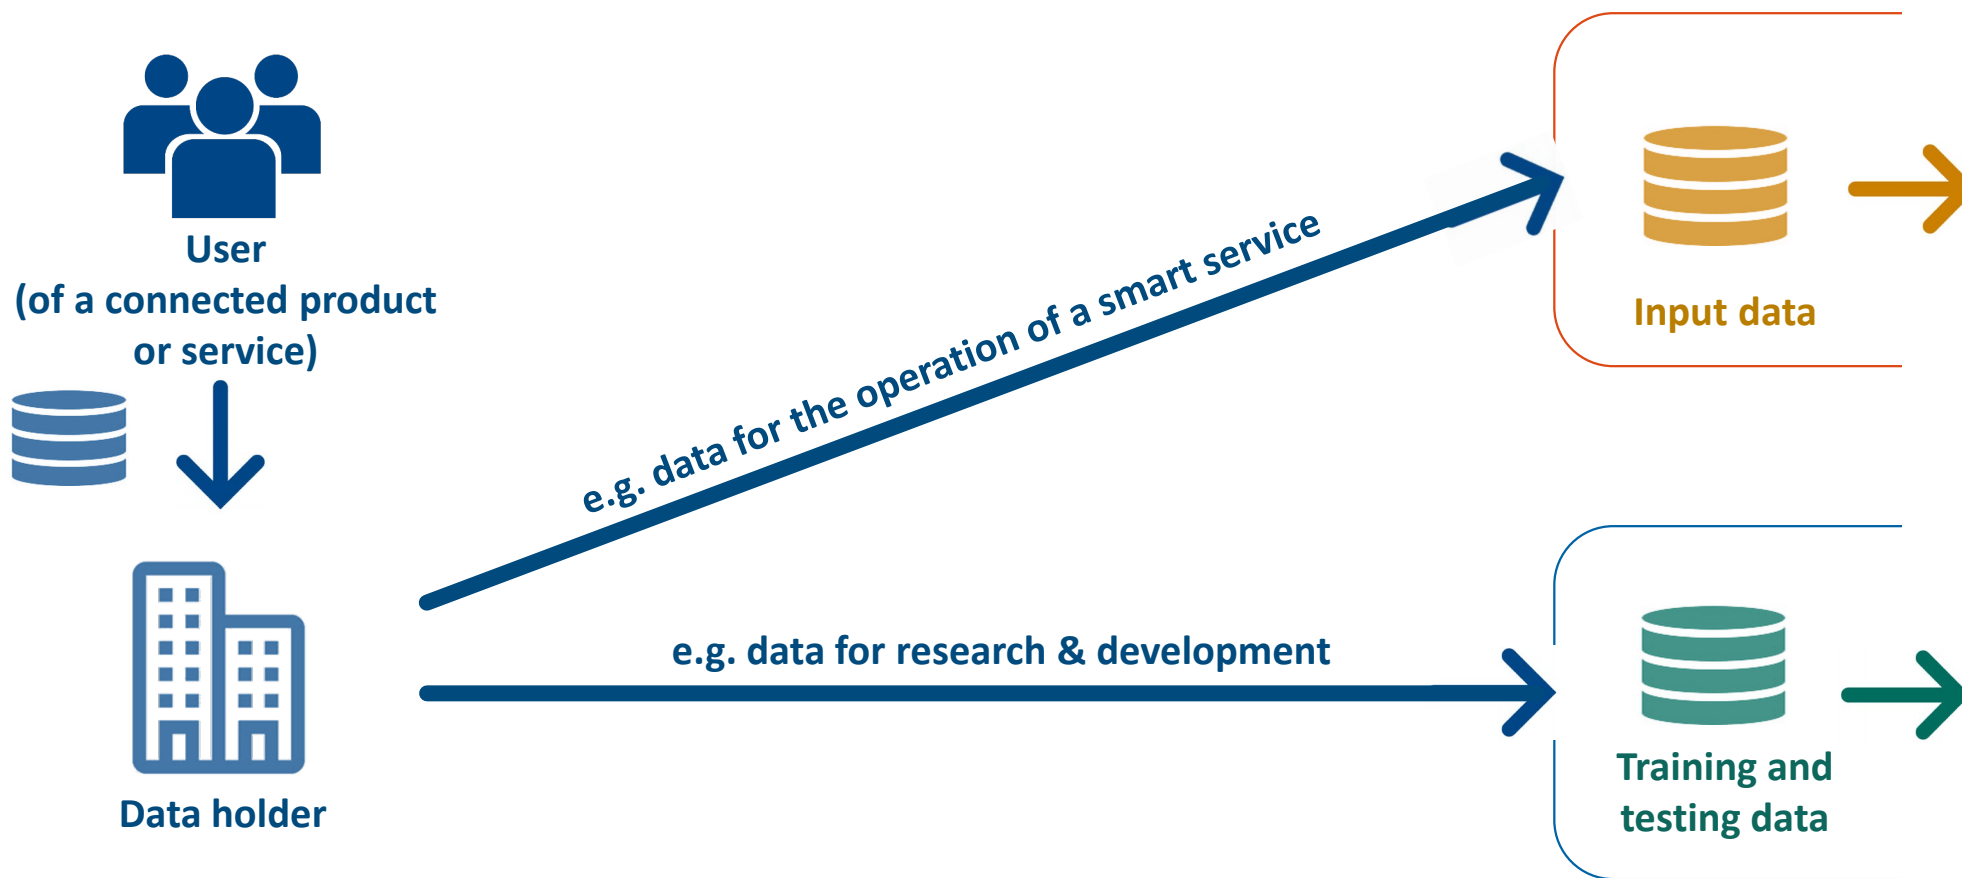

Open Data Directive & implementing regulation on high-value datasets and Chapter II of Data Governance Act (DGA)

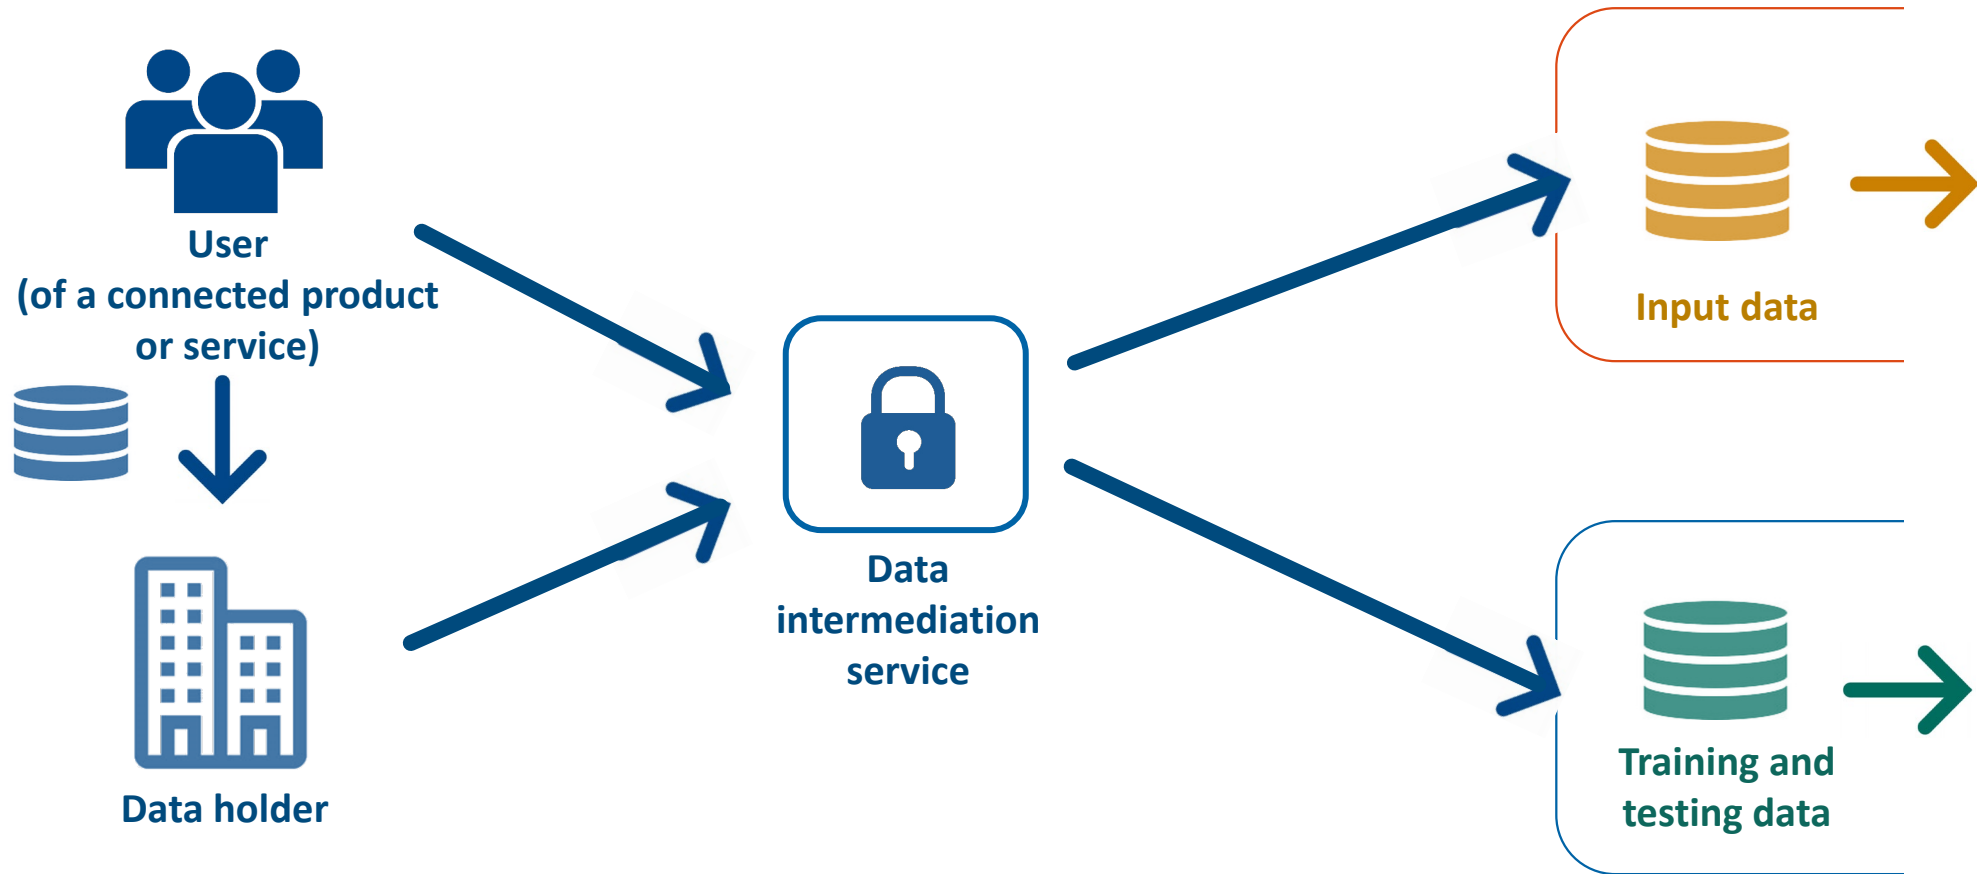

European Health Data Space (EHDS)

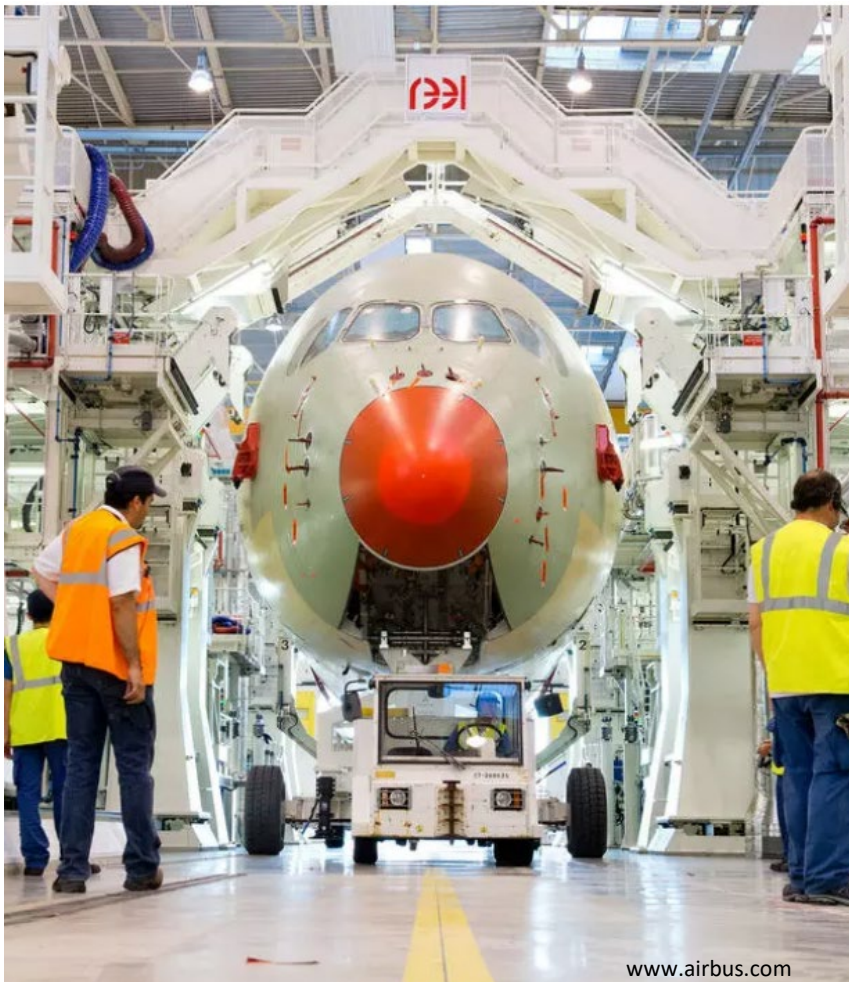

Real-time data portability under Digital Markets Act (DMA) and Data Act ...

... boosted by data intermediation services (Chapter III of DGA)

Three Use Cases

**How do we ensure that Europe's economy,
digital sovereignty and security strategy are not put at risk?**
